Mycometer[®]-surface

Quantification of mold/fungi on surfaces

Project Name	Mr Lccc		_ Analysis Date			11/19/2014	
Location	xxxx						
Collected by	D xxKER						
Sample ID/No.	Sample Location & Surface Type	Sample Date	Mycometer Surface Value (MSV)	Result Category A	Result Category B	Result Category C	
1	BATHROOM WALL	17th Nov 14	5	Х			
2	BATHROOM FLOOR	17th Nov 14	20	х			
Interpreta	ation Categories:						
Α	Fungi concentration is not above normal background level (MSV ≤ 25)						
В	Above normal background level; typically,high dust spore levels, low density or old fungal growth (MSV >25 < 450)						
С	Level of fungi is high, above normal background level, due to fungal growth (MSV > 450)						
BDL	elow detection limit Habberto
